Backend: Node.js, Express.js, NestJS, PostgreSQL, MongoDB, Docker

Tools: Git, GitHub, Postman, Swagger, Jira, SCRUM

Proyectos

• **Ease Hire - development stage**

July 2024 - Present

This product addresses the challenge of finding reliable labor for everyday tasks in Argentina. It facilitates connection between people with specific needs and those capable of fulfilling them, providing security for both parties. If you've used Facebook Marketplace to find a handyman, you'll understand its purpose.

Responsabilities:

- Design and develop the application architecture using **NestJS** and **Next.js**.
- Implement search and connection functionalities between users with specific needs and service providers.
- Integrate user authentication and security using **JWT** and **bcrypt**.
- Optimized database performance and efficiency with **PostgreSQL**.

Technologies Used: NestJS, Next.js, TypeScript, PostgreSQL, CSS.

Deploy: <https://easehire.vercel.app/>
